

Leaving No One Behind in Canada: Empowering communities through localization of the SDGs

Stefan Jungcurt

International Institute for Sustainable Development (IISD)

2030 Agenda – Leaving no one behind

As we embark on this great collective journey, we pledge that no one will be left behind. Recognizing that the dignity of the human person is fundamental, we wish to see the Goals and targets met for all nations and peoples and for all segments of society. And we will endeavour to reach the furthest behind first.

Why “leaving
no one
behind”?

We live in a middle-class
world

Except those who don't

No matter where they
live

Leaving no one behind in Canada

- Who is being left behind in Canada and how can we measure their wellbeing?
- What are the data challenges?
- How can we address them?
- *What are other countries doing?*

LNOB in Canada Key findings

Literature review: **Even with good data, some groups are excluded**

International Practices: **Few countries report on LNOB, none reported on data issues**

Vulnerable Populations in Canada: **About 15% of Canadians are affected by low income. Several populations face harder challenges than others**

Data Scan: **Data abundance in communities and organizations working with vulnerable groups**

Joining-up data: **Mission-driven data ecosystems vs. complementary bottom-up monitoring**

Vulnerable Group	Condition	Risk Factors
Recent Immigrants	Income, housing, food	Age, location, lone parents
People with disability	Poverty, food , education	Multiple disabilities, lone parents, LGBTQ+
Indigenous groups	Income, education, life expectancy, food, alcohol	Women, children, location, education

*In Canada, there is a
need and an opportunity
for complementary,
bottom-up measurement
and reporting for LNOB*

An open-source platform enabling communities to build customized online portals for data visualization and communication

Health

Life Expectancy (Male) Sustainable Development Goals

3. Ensure healthy lives and promote well-being for all at all ages

Ensuring healthy lives and promoting the well-being for all at all ages is essential to sustainable development. Significant strides have been made in increasing life expectancy and reducing some of the common killers associated with child and maternal mortality. Major progress has been made on increasing access to clean water and sanitation, reducing malaria, tuberculosis, polio and the spread of HIV/AIDS. However, many more efforts are needed to fully eradicate a wide range of diseases and address many different persistent and emerging health issues.

[Learn more from the UN here >>](#)

Related Life Expectancy (Male) Targets

- 3.4** By 2030, reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being

Next Steps

LNOB in Canada

- Engage communities and groups working with vulnerable populations
- Establish participation
- Mobilize Data

Tracking Progress

- International network
- Explore usefulness for LNOB country partners
