

# Finding and Analyzing Data

## FINDING AND ANALYZING DATA

When looking at data, ask yourself the following questions:

<b>What is significant?</b>	<b>What questions does this raise?</b>
What do you notice? What is surprising? What information is here? What is intriguing?	Connections Comparisons Patterns I wonder why...? I wonder how...? How will x change? How is x impacted by y?
<b>So, what/now, what?</b>	<b>What else?</b>
What needs to change? What action do we need to take? How might we use this data to inform our work? What strategies could be most effective?	What else do we need/want to know? Where do you go from here? What does IYI need to find out?
