

Community Indicators Consortium (CIC)

VISION:

Community indicators will be used by all communities to monitor community conditions that create inequity and to facilitate sustainable improvements in quality of life.

MISSION:

As the worldwide central knowledge and organizational hub for community indicators projects, CIC advances and supports measurable, equitable and sustainable improvements in the quality of community life.

GOALS:

Increase the use of community indicators for monitoring community conditions and advancing sustainability and improvement of community well-being.

- Provide resources and tools (conference, webinars, training...) for Community Indicator Projects
- Promote the use of data with equitable lens
- Network/Discussion/Training Opportunities
- Cultivate expertise through publications to support use of CIPs

Promote community engagement as a critical component of community indicators, the baseline from which community indicators should be developed, and the foundation for work to address inequities.

- Offer training on community engagement
- Partnerships with community engagement/equity organizations

Expand linkages and mechanisms, across disciplines, to share knowledge across geographies and between organizations using or promoting the use of indicators.

- Collaboration with similar organizations
- Strengthen opportunities for members to interact
- Diversity on the CIC board
- Strengthen membership benefits
- Expertise sharing across disciplines and geographies
- Foster excellence with respected awards

Grow organizational capacity for CIC and community indicators projects.

- Training on improving organizational capacity
- Grow membership
- Fundraising to support CIC and to do research to support CIPs
